

Dear Mr. FCC Chairman,

Please do not expand the cap on single owner control of multiple media and multiple outlets. AM radio is a disaster which is poisoning our civil discourse. Howard Stern is hardly a great leap forward for our civilization. In the most recent hearing you warned against regulating what is popular. So if kiddy porn or videos of people killing other is popular you deem that the FCC should do nothing. The public has spoken. A single motivation, profit can lead to ridiculous results and consequences. The reason we have curbs on the market such as controlling monetary flow and interest rates is because the market can be very irrational which is not a good thing for a democracy. We have automatic brakes on computer trading for the same reasons. The FCC is supposed to regulate in the public interest. Not a few private interests. Please listen to us the public.

Eric Kramer, Professor of Communication, The University of Oklahoma
